

Promotion no. 3 September - November 2024

TruTool - TKF 1500 single speed and TKF 1500 dual speed bevellers
Free additions (valued over \$1000)

Perfect preparation for weld seams

With our TruTool - TKF 1500 single speed and TruTool TKF 1500 dual speed bevellers, you can prepare high quality bevel edges up to a chamfer length of 15 mm in a single operation. The process does not generate any dust, fumes or flying sparks. The low surface roughness and the oxide-free surface guarantee highly durable weld joints.

Free additions

10x standard cutting tool
(material no. 1263029)

and

1x left roller holder
(material no. 1240848)

10x

Standard cutting tool
For processing mild steel
between 300 - 500 N/mm²

1x

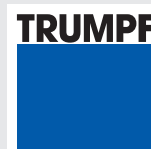

Left roller holder
For optimal machine stability
on long, straight steel plate

* price excluding VAT

The overview

- High-performance 2600 W motor for high durability
- TKF 1500 with 2-speed gearbox: ideal for high-tensile sheet metal
- Easy and quick setting of bevel height and sheet thickness
- Angle of bevel continuously adjustable from 20 – 45° (55° max. with special stripper)
- Punches replaceable without tools

APPLICATIONS

For K, V, and Y edges. For straight sheet edges, radii, inner contours and pipes.
