LASER trade fair: How AI will change laser technology in the future

Artificial intelligence is entering manufacturing. How AI is already making laser processes more robust and how it will change laser technology in the future: these things are explained in this video by TRUMPF experts Florian Kiefer and Martin Stambke as well as Prof. Dr. Carlo Holly from Fraunhofer ILT, Dr. Ing. Andreas Wetzig from Fraunhofer IWU and Dr.-Ing. Stephan Roth from the Bavarian Laser Center.
