Zum Produkt

Beer production is a complex process that requires high precision and reliability. The TruBend 7036 is a laser bending machine designed for high-volume production of beer cans.

### TruBend 7036

TruBend 7036 — a laser bending machine for beer cans. It features a compact design and high precision. The machine is equipped with a laser sensor for accurate bending. It is suitable for high-volume production of beer cans.

[Zum Produkt](#)

### TruLaser 1030 fiber

TruLaser 1030 fiber — a laser cutting machine for beer cans. It features a compact design and high precision. The machine is equipped with a fiber laser source for accurate cutting. It is suitable for high-volume production of beer cans.

### TruLaser Tube 5000

TruLaser Tube 5000 — a laser cutting machine for beer cans. It features a compact design and high precision. The machine is equipped with a laser source for accurate cutting. It is suitable for high-volume production of beer cans.
